*Reasons For Allowance*

The following is an examiner's statement of reasons for allowance: the broadest claim present is claim 10, which broadly sets forth the combination of a display mattress protector attached to a mattress, in which the protector is made as a clear sheet with reverse indicia printed on a bottom surface of the sheet and also includes a cord used to secure the protector to the sheet. Since the claim uses the phrase "protector that is attached to a mattress" it is interpreted as setting forth a combination of the protector and a mattress, with the cord then securing the protector to the mattress. Clear display protectors of this type are well known in the art, see the cited patents to Oakhill et al and Stevenson for examples of such. In the prior art devices the protector is secured to the mattress by overlapping ends and/or direct engagement with the mattress, and not by a securing cord. There is no motivation within the prior art of record for providing either of the above patents with a securing cord, and as such the claims are considered to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
